Backend Development

Express, Node.js, Fastify, TypeScript, Socket.io, Clean Architecture, GraphQL

Database

MongoDB, PostgreSQL, MySQL, Firestore

Integrations

Firebase, Razorpay, OpenAI

Deployment

Docker, Firebase, Vercel

Data Structure

Linked List, Searching, Sorting, Stack, Queue, HashMap, Tree, Trie, Graph

Tools

Git, Postman, ChatGPT, Figma, Canva, Adobe XD

Familiar With

AWS/EC2, Route53, DigitalOcean, Machine Learning, Data Science

WORK EXPERIENCE

Senior Full Stack Developer at Lyracorp — Apr 2024 - Current

- Architected and implemented a comprehensive database schema, backend services, and frontend structure for Lyracorp's ERP software.
- Pioneered the project's inception phase by establishing foundational architecture and guiding the development team's technical direction.
- Drafted and enforced technical strategies and roadmaps aligning with business objectives and industry-leading practices.

MERN Stack Developer at Necttos — Dec 2023 - Feb 2024

- Engineered automation software designed for educational institutions to manage accounts, student data, teacher profiles, and library resources.
- Facilitated successful group project planning and execution, resulting in seamless collaboration and task completion.
- Collaborated with cross-functional teams to meet collective goals and objectives.
- Maintained high accuracy and efficiency in daily operations.
- Adhered to documented procedures and instructions to align with project specifications.

MERN Stack Developer at Brototype — Apr 2023 - Nov 2023

- Engineered a full-stack web application from the ground up, including backend services, front-end interfaces, and database management.
- Portfolio features a major e-commerce platform and a freelancing portal equipped with video, audio calls, and chatting functionalities via WebRTC for client-developer interactions.
- Worked collaboratively with a diverse team to achieve project objectives and resolve product-related issues.

MERN Stack Developer at Necttos — Feb 2023 - Mar 2023

- Engineered automation software tailored for educational institutions to manage accounts, student details, teacher profiles, and library resources.
- Planned and executed group projects successfully, ensuring smooth collaboration.

- Collaborated with cross-functional teams to accomplish shared objectives.
- Maintained accuracy and efficiency in daily operations.
- Followed oral and written instructions effectively to meet project specifications.

ACADEMIC PROJECTS

Freelancing Portal

- Developed using React, Express, Tailwind CSS, MongoDB, and Context API for state management.
- Implemented JWT authentication and integrated Razorpay for a secure payment gateway.
- Implemented real-time chat functionality using Socket.io and integrated video and audio calls using WebRTC.

Tic-Tac-Toe

- Developed with Next.js (TypeScript), Express (TypeScript), Tailwind CSS, MongoDB, and Redux for state management.
- Implemented JWT authentication and added Razorpay for a secure payment gateway.
- Implemented real-time gaming functionality using Socket.io.
